See reading lists differently

Ex Libris Leganto reading list technology and our campusM® mobile app platform integrate with core library and campus systems to create mobile portals that power teaching and learning success.

FOR LIBRARIANS

- Seamless library workflows through Alma, Primo and Summon
- Support instructors in developing reading lists
- Handle copyright clearance properly to mitigate risk
- Evidence-based collection development and enhancement

FOR IT PROFESSIONALS

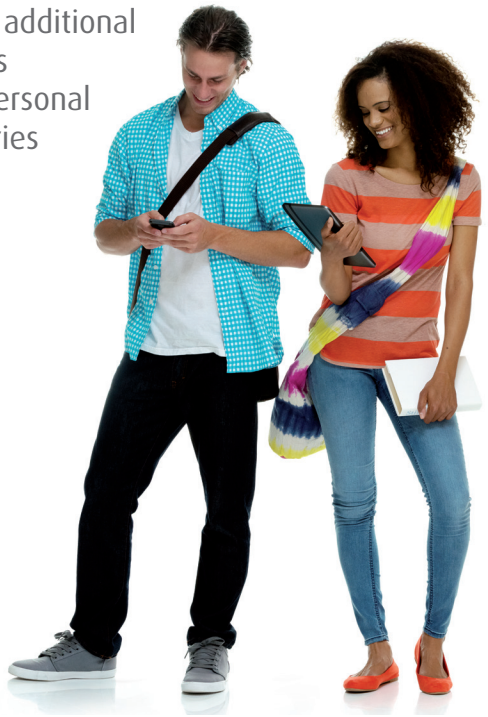

- Powerful app development and deployment platform
- Single presentation layer for desktop and mobile
- Pre-built native apps and a fully responsive portal
- Integrate with library apps, LMS', VLEs and student records

*smart phones are very smart but as you know they can't do everything. So not all functions will be available on your smart phone.

FOR STUDENTS

- Easily retrieve course materials from any device
- Collaborate and share with classmates and instructors
- Discover additional materials
- Create personal repositories

FOR ACADEMICS

- Share structured, rich, annotated reading lists
- Draw on automated content recommendations
- Easily maintain, monitor and share reading lists
- Leverage analytics to gain insight into usage
