2024 Timeline

2024 - Themes and Features

2024 - Main Themes of the Year

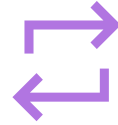

Personalization & Actionability

Contextualize the experience of your students by giving them the right information at the right time. Drive action effortlessly with upfront and easy to use features.

Attendance

Stabilization of feature in React Native, together with enhancements to user experience to drive successful adoption and usage

Integrations

Keep integrating seamlessly with more best-of-breed products. Make your app the central hub of the student life.

Library-oriented Features

Enable your students use all the variety of library services in one place.

H1 2024 Highlights

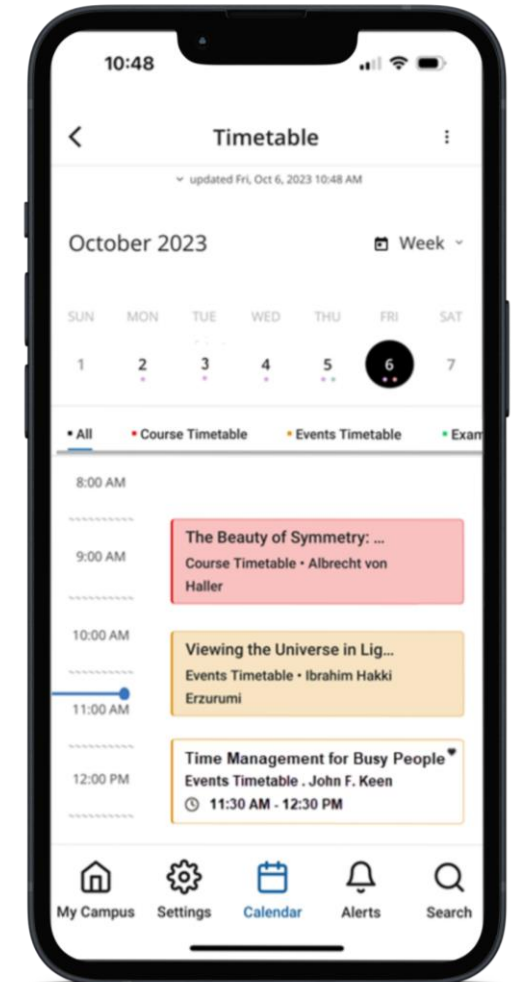

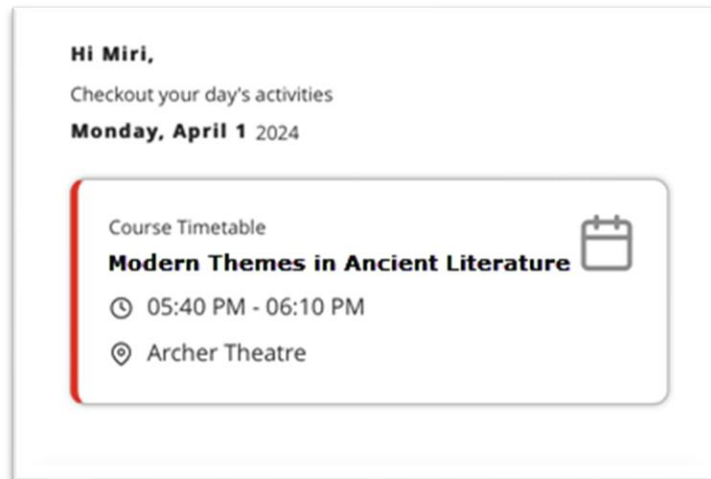

DayView - Show the students what they need, when they need it

DayView is an immediate view of your students' next steps for the day.

In H1 we added favorited and registered events into the unified calendar view, added direct access to the calendar from the menu bar and created a Quick Peak Smart Tile that shows the students their next activity.

Personalization & Actionability

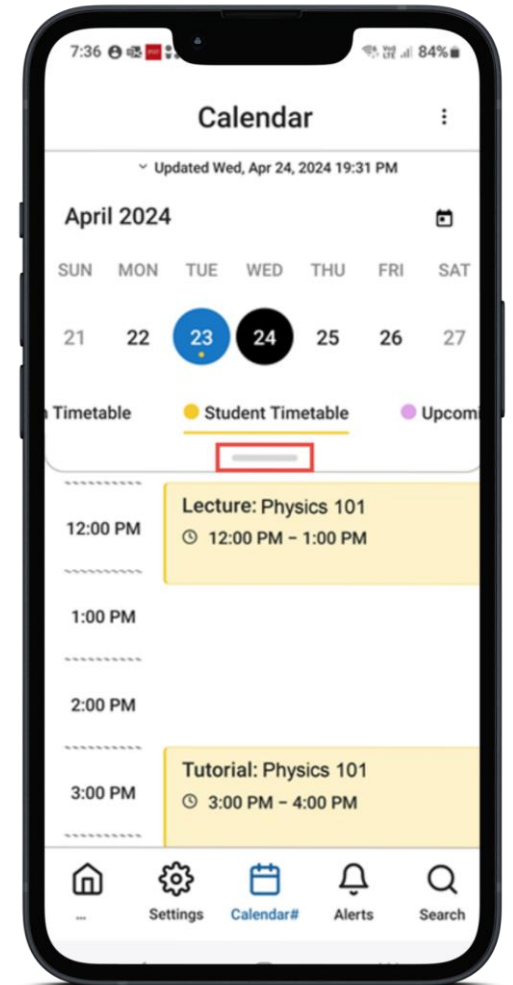

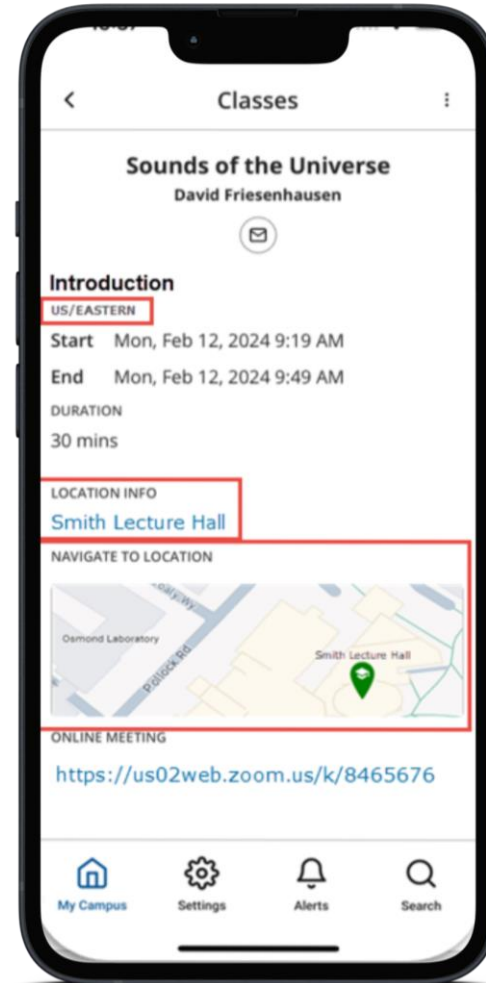

React Native Calendar - Make it easier for students to navigate their schedules

- Enhancements in Class Details Pages
 - Time zone display
 - Location Information
 - Navigate to Location
- New "Go to today" button
- Enhancements to the week/month top bar

Personalization & Actionability

Attendance - Streamline administrative tasks

- Enhanced Lecturer bulk-management - Lecturers can now select multiple students to check-in or mark absent using Select All Unsubmitted Students and Select All With Status buttons. In addition, when one or more students are selected, lecturers can set their status in one action, by selecting an option from below the list of students.
- Attendance - Export of Data to CSV

Rolling molecules, switching atoms, and touching electrons. | 16 Nov 2023 16:08 - 16:38

<input checked="" type="checkbox"/>	Priya Jhamat	Not Checked-in	⋮
<input checked="" type="checkbox"/>	Eddie O'Neill	Not Checked-in	⋮

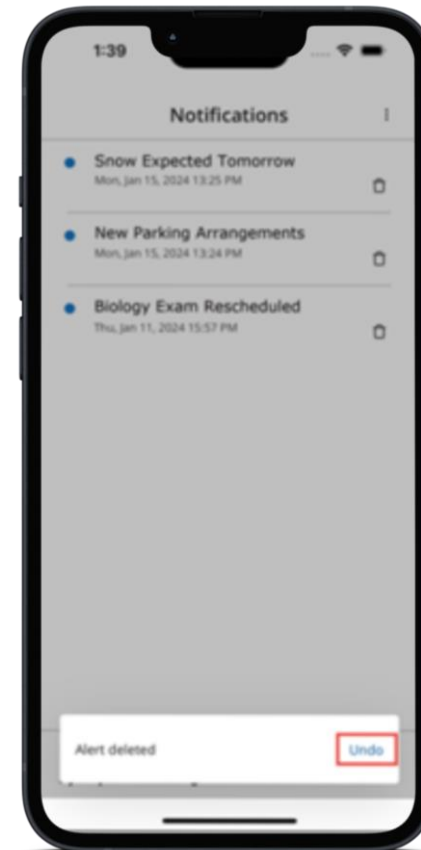

Check-in 5 students

Mark 5 students as absent

Undo 5 selected check-ins

Notifications - Improve personalization and flexibility

- Send notifications based on advanced roles - easily send notifications to students combining two different roles without creating a group first.
- Editing of Future Notifications - edit scheduled notifications that have not yet been sent.
- Undo for Deletions - this allows the students to undo the deletion of the notification right after the action.

Integrations

- Events Product Integrations - Support for JSON Imports
- Alma role-sync – support for Alma as a vendor in the Role-Sync product integration
- REST API for User Holds
- REST API for Account Information
- Support for New Leganto UI

Integrations

H2 2024

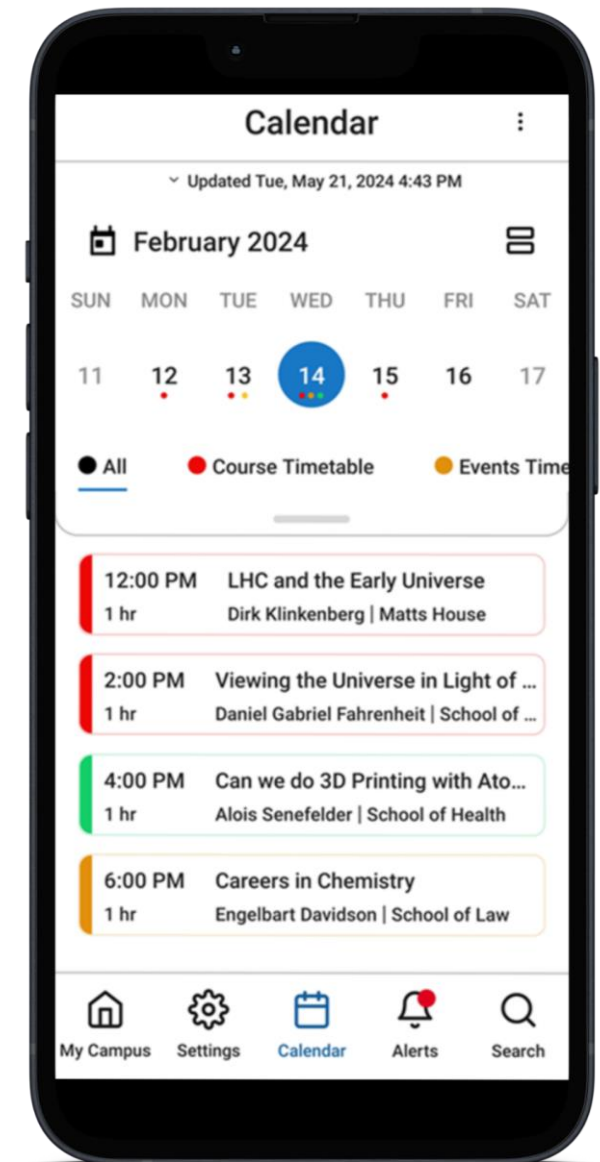

React Native Calendar - Agenda View

The agenda view will allow your students to easily view their activities for the day at a glance. This view is more concise, but it still retains all the important information and the color coding per each calendar feed.

Students will be able to switch views between the original timeline view and Agenda View at their convenience.

Personalization & Actionability

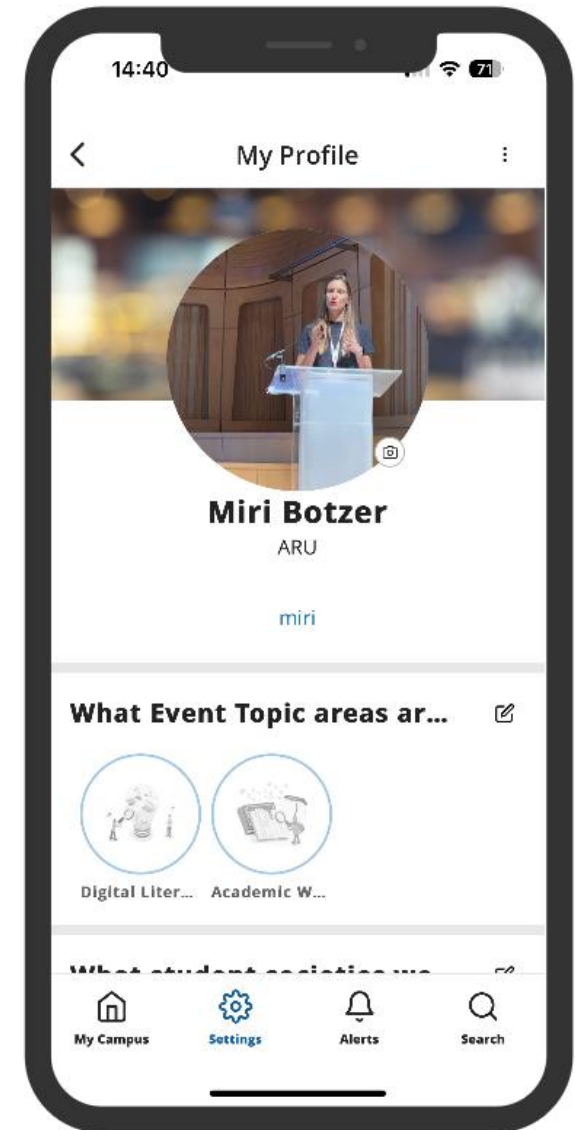

Populate My Profile on App Access

Encourage your students to view and populate My Profile by making it a part of the initial sign in process to access the app.

Use the captured tag metadata to personalize your users' experience based directly on their preferences.

Personalization & Actionability

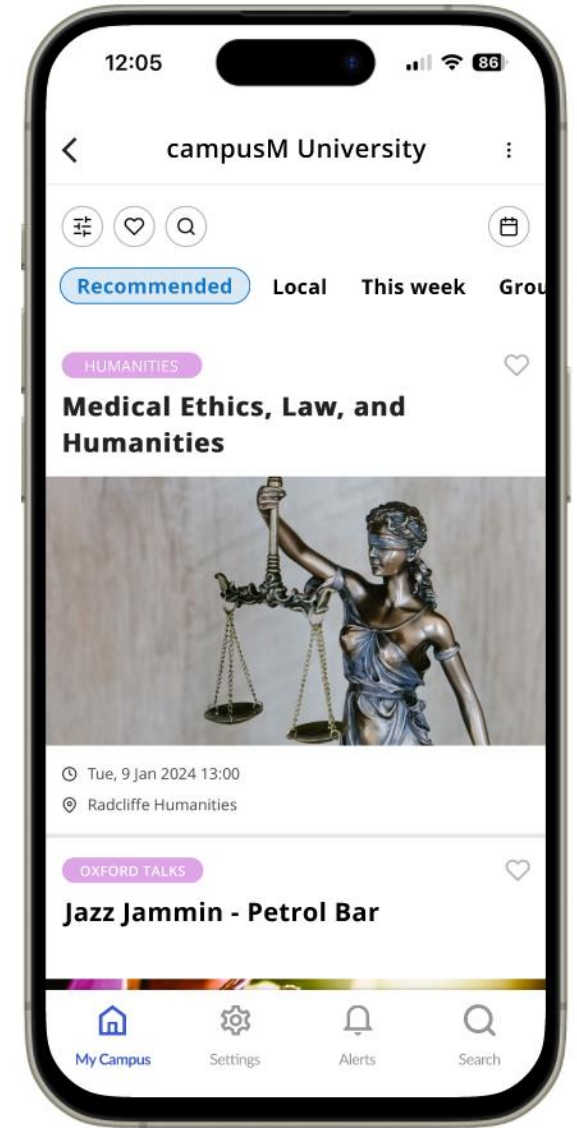

Event Recommendations

Ensure your students never miss out on exciting opportunities!

Leverage our recommendations feature to guide students to the most relevant and engaging events. Powered by the Events Product Integration, as well as roles and tags, our system ensures personalized suggestions.

Personalization & Actionability

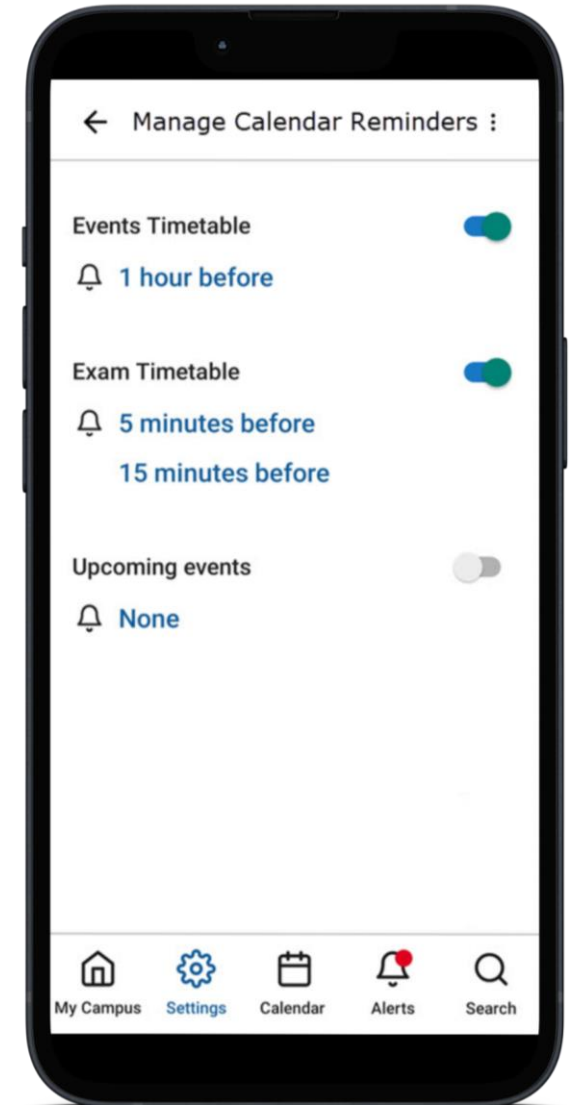

User-driven Reminders

Empower your students to keep on top of their calendar by enabling them to manage reminders for their activities

Students can configure one or more reminders for each of their Calendar feeds, or remove them completely.

Personalization & Actionability

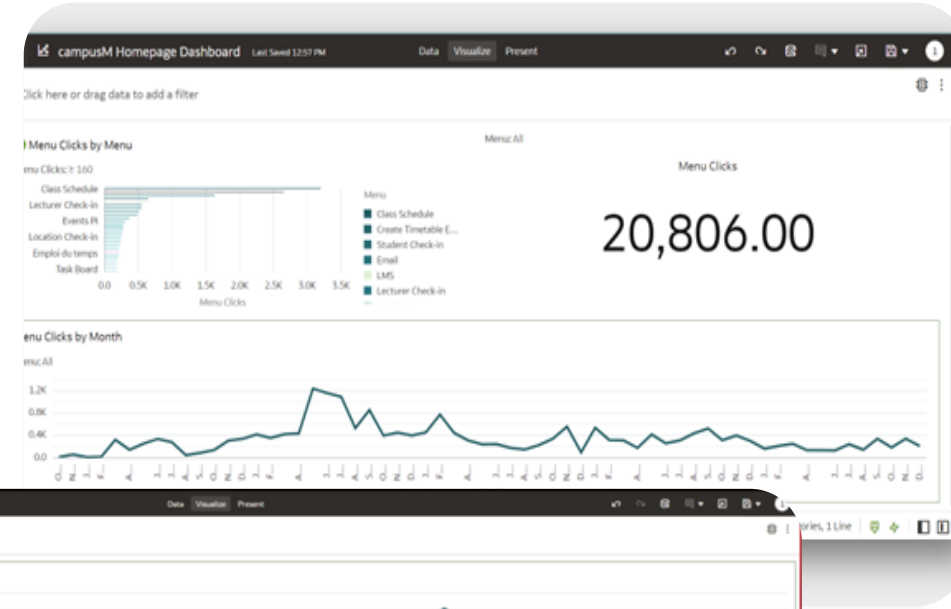

Personalization Tools for Administrators

Analytics – Roles Addition

- Gain deeper understanding of the usage statistics with the addition of roles and tags fields. Segment your data to make better decisions regarding the app.

Personalization & Actionability

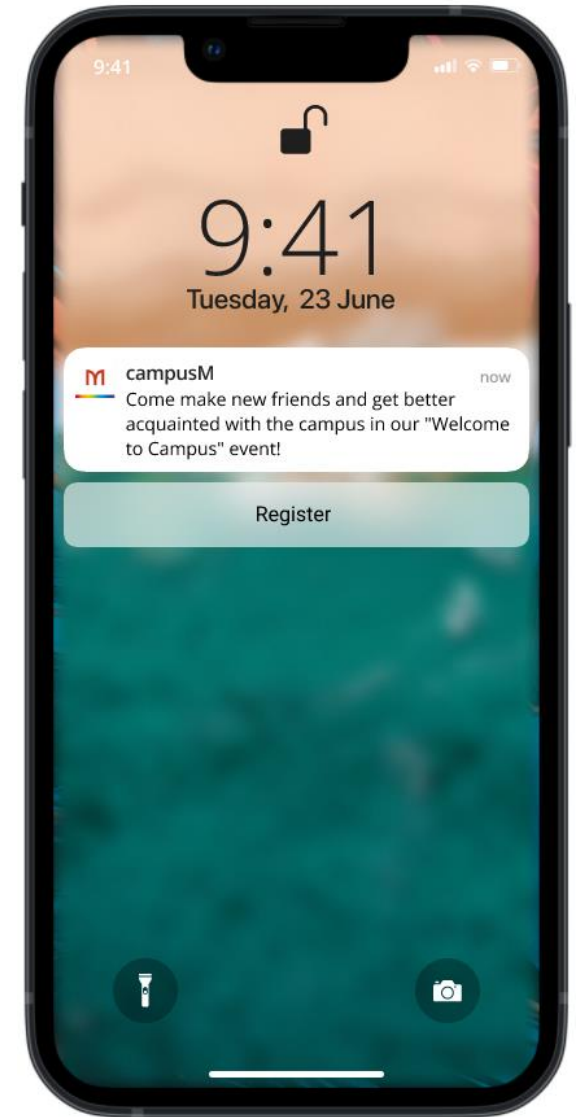

Actionable Notification

Empower Students with Actionable Notifications!

Enable your students to get where they need more efficiently straight from the notification screen.

You will be able to include a link that will take the student to the Product Integration/ Content Page.

Personalization & Actionability

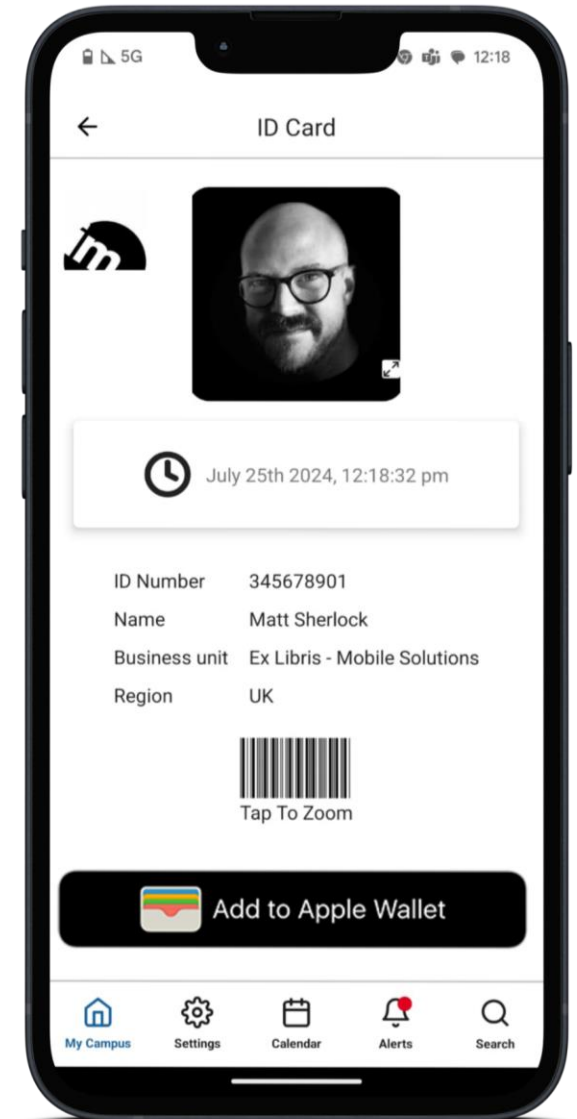

Adding campusM ID card to Apple/Google Wallet

Let your students have their ID card ready at hand by enabling them to save it to their Apple or Google Wallet.

This will enable your students to easily access their Digital ID card from outside of the app, whenever they need it.

Personalization & Actionability

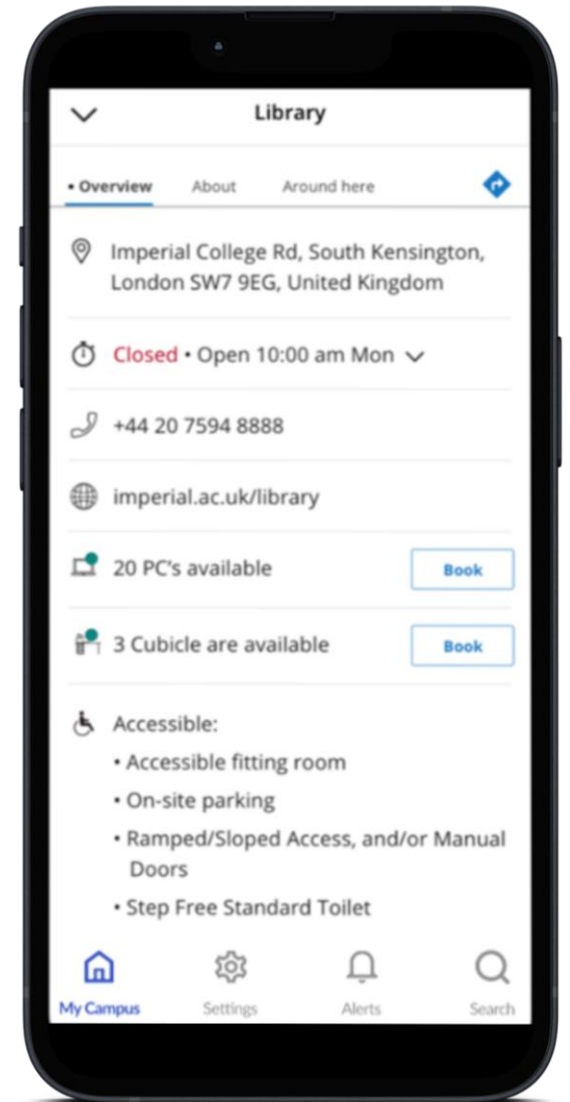

Dynamic Location Information

Leverage the power of our product integrations to incorporate your live resource availability data into Locations, helping your student's find what they need when they need it

For example, available seats, available PCs, accessibility notes, free parking spaces etc.

Personalization & Actionability

Space Booking - integration with LibCal (SpringShare)

Let your students book study spaces and places for social events easily around the campus.

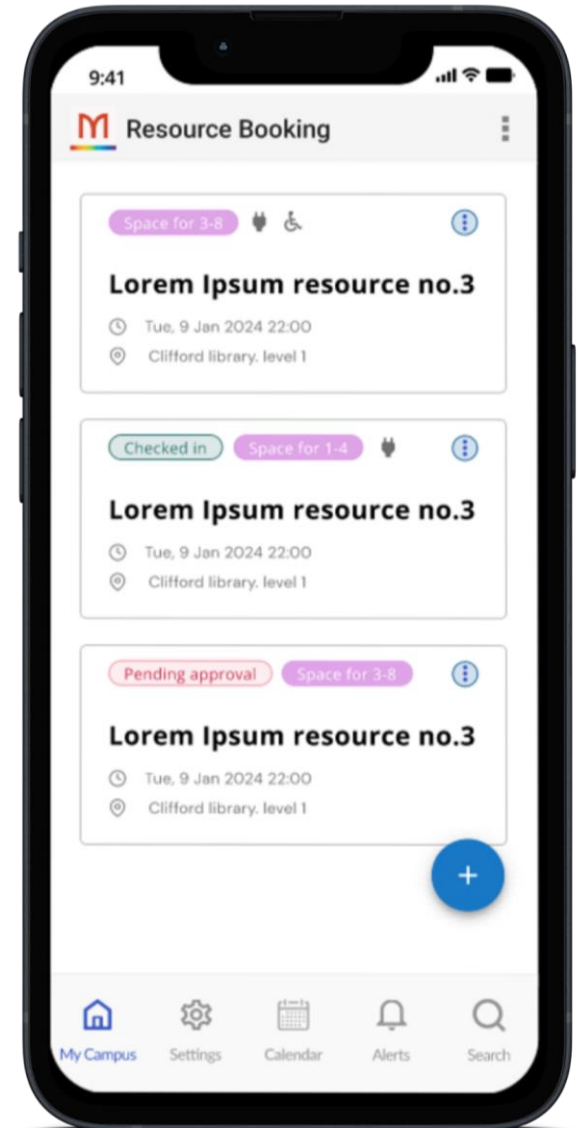

An integration with LibCal will provide the students a seamless experience in booking a space straight through campusM.

Integrations

Library-oriented
Features

Additional Enhancements

- Enhanced Accessibility and renewal of the Accessibility Statement for mobile platforms to comply with the WCAG 2.2 standard
- Attendance
 - Informative prompts for device permissions
 - Addition of reasons for check-in failure to the API

Thank you
