
Leganto 2025 Roadmap Highlights

Overview

The Leganto roadmap is a means to communicate the key priorities and developments with the Leganto community. The roadmap is based on feedback received from the Leganto community.

The Leganto roadmap gives a view of the development that can be expected. As priorities are developed by the community and information becomes available from the community voting, the roadmap will be updated to reflect updated development plans.

Roadmap Themes

Our roadmap focuses around our key themes of providing additional value to libraries through efficient workflows and return on investment on library collections, increasing adoption among instructors through intuitive processes and added value, prioritizing student engagement, including access, affordability, and learning, and providing analytics support decision-making and the ability to demonstrate the library's impact.

H1 2025 Enhancements

Clipboard

What's New	Highlights	Impact
Copy and move items in bulk using a clipboard	Expand on existing copy and move workflows by setting items aside on a clipboard for later use. Useful for: • Moving items within long lists • Parking items until you're ready to place them in a list • Copying items multiple times within or across lists	Library value: Make it easier to review and process lists in Leganto so the library can support instructors more efficiently.

Link or relink item to library

What's New	Highlights	Impact
Link a citation to a specific resource within the library collection.	• Replace incomplete metadata by efficiently searching for resources in the library collections • Link citations to specific resources while preserving tags, notes, due dates and usage information from the original citation	Library value: Work more efficiently when processing lists in Leganto.

Bolk integration enhancements

What's New	Highlights	Impact
Additional enhancements to the integration with the Bolk copyright system used in Norway	• Review and complete in Bolk (January) • Show locked indication • Update Bolk status via Leganto UI • When deleting a list, delete the Bolk requests	Library value/Drive adoption: make it easier for library staff and instructors to create and manage copyright-compliant lists in Leganto.

Import syllabus to create resource list (Part 1)

What's New	Highlights	Impact
Library staff can upload a syllabus or other file containing references. Leganto will use AI to scan the file and generate a resource list.	• Library staff can upload	Drive adoption/Library value: Make it easier to start using Leganto--create even lengthy resource lists in minutes, leveraging existing information about course materials.

What's New	Highlights	Impact
	- files • Import PDF, Word, .txt files • Paste references to create list • Multi-lingual support	

Citations by publication country dashboard

What's New	Highlights	Impact
View citations by publication country	• View citations by publication country in a visual manner • Filter reports by academic department	Analytics: measure and demonstrate the diversity of resources used in reading lists

H2 2025 Enhancements

Student exploration

What's New	Highlights	Impact
Open other formats and editions and recommendations for student use	• More details available for non-list items (suggestions, favorites) • Expose other formats and editions to students • Expose recommendations (bX, shelf browse) to students	Student engagement: Provide additional exploration and learning opportunities related to assigned course materials.

DCS integration enhancements

What's New	Highlights	Impact
Support new data structure within the DCS, used in the UK	The DCS is creating a new structure which will support linking one list to multiple courses, similar to the structure in Leganto. Leganto will integrate with the new API once it is available	Library value: Streamline the integration between Leganto and the DCS, resulting in fewer errors due to mis-matched data across the two systems.

Leganto data integrated into Rialto

What's New	Highlights	Impact
View Leganto data within the Rialto marketplace.	- Bulk searching of items in a reading list within Rialto - Refine searches by citation tags, current/future courses - Purchases will link to the citation/s; citation/s metadata will update automatically	Library value: streamline the purchasing processes so the library can provide access to course materials more efficiently.

Rialto integration: newer edition available for purchase

What's New	Highlights	Impact
Indication in Leganto, based on data from Rialto, that a newer edition of a title is available for purchase.	- Add an indication in Leganto when Rialto has a new edition not held by the library - Provide the option to add the newer edition to the list and/or request purchase	Library value/Drive adoption: Ensure that instructors are aware of newer editions which they might choose to use in their courses. Ensure the library has an efficient means to purchase newer editions when requested.

Import syllabus to create resource list (Part 2)

What's New	Highlights	Impact
Instructors can upload a syllabus or other file containing references. Leganto will use AI to scan the file and generate a resource list.	- Instructors can upload files - Workflow to manage non-linked items - Add references to sections within existing lists	Drive adoption/Library value: Make it easier to start using Leganto--create even lengthy resource lists in minutes, leveraging existing information about course materials.

OER recommendations

What's New	Highlights	Impact
Recommendations for open educational resources (OER) that align with the course topics	- Leverage AI to scan course information (such as a syllabus) to identify key topics and themes - Recommend OER to align with	Drive adoption/Library value:/Student engagement: Promote the usage of OER, help instructors find alternatives to textbooks, provide additional value to instructors within Leganto

What's New	Highlights	Impact
	course topics	

Integration with Alethea

What's New	Highlights	Impact
For institutions who have both Leganto and Alethea, provide an integrated experience across systems	• Pass users from one system to the other • Joint solution provides both access and engagement	Drive adoption/Student engagement: Joint solution provides access to resources, copyright compliance, and deeper engagement with course materials

Workflow reports

What's New	Highlights	Impact
Out of the box reports to enable libraries to measure and report on processing workflows	Additional measurements to track citation status changes Out of the box reports to measure library processing workflows to answer questions such as: • How many readings are complete by day one of courses? • How long does it take us to process a list after it has been submitted? • How many citations can we complete in a week? • What percentage of citations require library processing? • Which types of citations take the most time to process	Analytics: Gain visibility into library workflows, provide instructors with accurate expectations for turnaround times, and identify areas where further efficiencies could be gained
