

Leganto Roadmap 2021-2022

Dolav Ben-Artzi, Leganto Product Manager

Responsive Readings

Responsive Reading

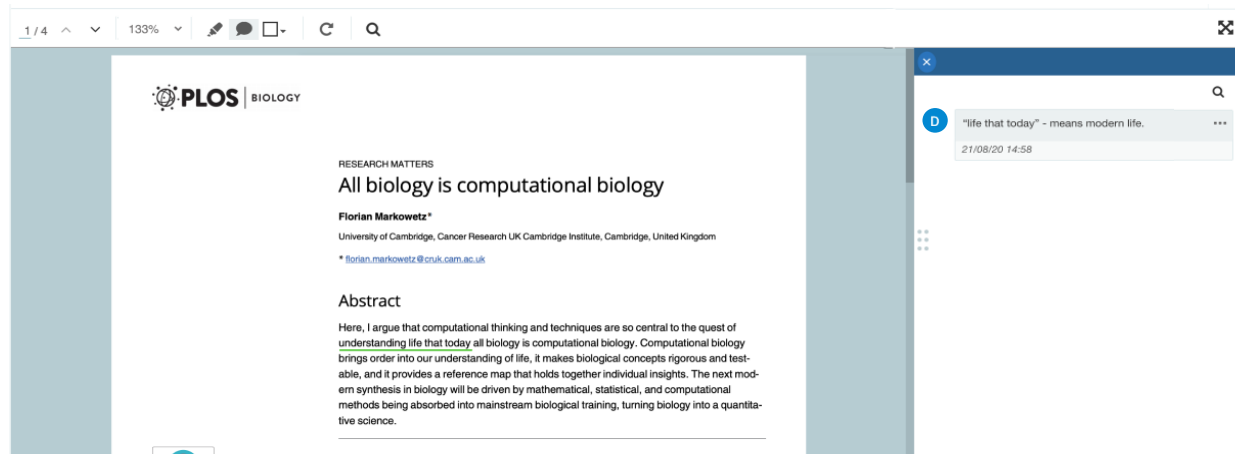

- Instructors want to:
 - Learn how students are using the course resources and what they understand
 - Teach according to the course syllabus, while encouraging critical reading and active learning skills.

Responsive Reading

- New types of reading assignments based on annotations on top of the text.
- Complementing the LMS with a new type of reading assignments it doesn't have.

Responsive Reading – Annotations & Assignments

Highlights:

- Private annotations - both instructors and students will be able to write private comments for their own use on a PDF file (H1 2021)
- Instructors will be able to create assignments for students based on students' annotations (H2 2021)
- Instructors will be able to grade the assignments (H1 2022)
- Instructors will be able to start a class discussion on a PDF file and allow students to add their public comments (H2 2021)

Impact:

- Increases instructor's engagement.
- Expands the library contribution to Teaching and Learning

Responsive Readings

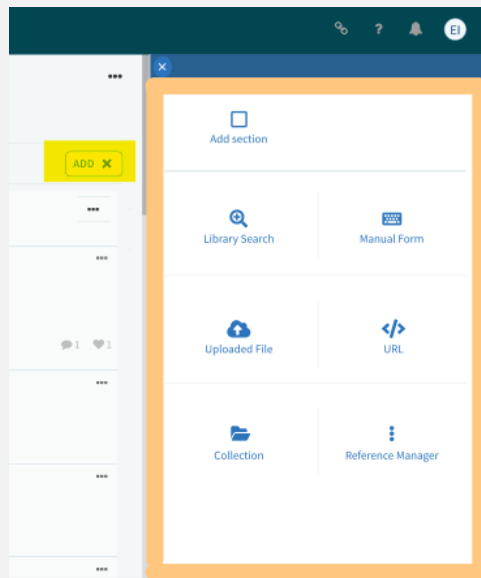

Leganto User Experience (UX)

Redesign of the List Header and Add Item Menu

Highlights:

- A new Add Item menu design will highlight options like adding files (H1 2021).
- The institution will be able to disable the file upload and reference manager options in this menu (H1 2021)
- The list header will be redesigned so the Add Items button and the Publish button will be more prominent

Impact:

Highlighting important options in Leganto menus

Leganto UX

New Options in the Edit Item form and Citation Full View

Highlights:

- Add the public note and due date to the Edit Item form (H1 2021)
- Add the citation menu to the Citation Full View (H1 2021)

CANCEL SAVE

Impact:

Simplifying Instructor's workflow in Leganto.

Leganto UX

Embed Citations in the Learning Management System

Highlights:

- Enable instructors to embed citations in the course home page of the Learning Management System (H1 2022)

Impact:

Streamlining the use of Leganto from the LMS.

Leganto UX

Customize Help Pages and Links

Highlights:

- Display useful links per role – the library will be able to choose one set of useful links for instructors and another for students.
- Show a custom help page in Leganto - the library will be able to replace the default Leganto help page with a link to a different help page (H1 2021)

Impact:

- Tailor the Leganto help to the local environment.
- Add relevant contact information and links.

Leganto UX

Offer a Choice Between Digital Viewers (Alma-D Integration)

Highlights:

- Support viewing files in digital viewers according to the digital viewers rules in Alma (same behavior as Primo) (H1 2021)

Impact:

Use the best viewer for each file type.

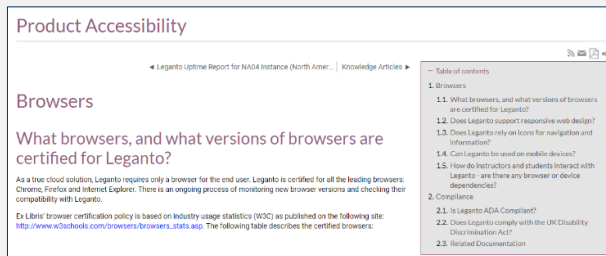

Leganto UX

Accessibility

Highlights:

- A new accessibility audit process is now conducted by an external audit company - Deque.
- The audit process has started in November 2020. Accessibility improvements are being developed as part of the process.
- Once the audit process is complete, a new VPAT 2.3 document will be published on the [Leganto accessibility web page](https://knowledge.exlibrisgroup.com/Leganto/Product_Materials/Product_Accessibility) in the knowledge center.

Impact:

Keep offering an accessible experience for Leganto users.

Instructors' workflows

Actions on Multiple Citations in Leganto

Highlights:

- Usability improvements to the existing multiple citations interface, based on community feedback (H1 2021) 
- Bulk update extended functionality: bulk copy or move multiple citations to other sections, lists, and the personal collection (H1 2022)

Impact:

Edit multiple citations efficiently.

Instructors' workflows

Reusing Reading Lists

Highlights:

- Associate a new course with a reading list that has active copyrights permissions (H1 2021) 
- Allow instructors to copy resources from master reading lists that are available to the entire institution (H2 2022)

Impact:

Easy to share resources between courses.

Instructors' workflows

Leganto Features Activation

New Admin Role for Customizing the Leganto Interface

Highlights:

- A new admin role will enable the user to customize the Leganto interface without affecting the core library workflows (H1 2021)
- The person with the new admin role will be able to activate basic Leganto patron facing functionality (for instructors or students), without accessing Alma (H1 2021)
- This role can also be given to a non librarian, either a consultant or someone from Teaching and Learning.

Impact:

Easy customization of the Leganto interface (for instructors or students)

Leganto Features Activation

Feature Recommendation

Highlights:

- Recommendations for feature activation will be presented in Leganto to librarians and the new admin role (H1 2021)
- Option to activate basic Leganto patron facing functionality (for instructors or students), without accessing Alma (H1 2021)

Impact:

Raise awareness for new Leganto features in order to keep improving the overall Leganto experience.

Leganto Features Activation

Library Workflows

Communication with Instructors— Automatic Emails and Q&A Feature Enhancements

Highlights:

- Automatic Emails:
 - Remind instructors to create a reading list in Leganto using the new Create List Reminder Emails (H1 2021)
 - Send Owner Subscription Letter when adding instructors through API (H1 2022)
- Questions and Answers feature enhancements - from Idea Exchange (H1 2022)
 - Adding a description to a question, for clarity
 - Triggering a question by multiple citation material types, to simplify the questions configuration.

Impact:

- Remind instructors to submit reading lists
- Seamless communication with instructors.

Library Workflows

Digitization

Highlights:

- For digitization requests, if the digital file exists in the system,  offer the option to attach a file to the citation automatically (H1 2021)
- Short digitization workflow: When placing a digitization request in Leganto, an institution will be able to choose between  activating the regular Alma digitization workflow or activating a short digitization workflow that will only mark citations with digitization requests (H2 2021)
- The instructor will be able to place a digitization request from the Add Items workflow (H2 2022)

Impact:

- Improvements to the digitization workflow

Library Workflows

Copyrights Approval Workflow

Highlights:

Alma:

- A new field for displaying the percentage of pages requested for digitization of the total number of pages (H2 2022)
- Clean the approval requests - move copyrights approval requests to history table (H2 2022)

Leganto:

- Add the copyright clearance request action to the Edit Item form in Leganto to remind instructors to place a request (H2 2022)
- Auto populate the course start and end dates in the instructors' copyrights form (H2 2022)

Impact:

- Improvements to the copyrights approval workflow

Library Workflows

Integrations with Regional Copyright Agencies

Highlights:

Norway (Bolk)

- New integration with Bolk copyrights system (H2 2021) 

UK (CLA)

- Support copyrights approvals for multi-course lists (H1 2022)
- Add a new job for synchronizing courses (H2 2022)

USA (CCC)

- Support CCC new API – infrastructure change, will not affect the current workflow (H2 2021) 

Impact:

- Improvements to the copyright approval workflow

Library Workflows

Operation Measurements

Highlights:

- Store list review dates (start and end dates) in analytics, for keeping track of the library workload. (H1 2022)
- For a fair prioritization process – report the original date of sending a list to the library for review in the Reading Lists review page (H1 2022) 

Impact:

- Measure the reading list's review process.
- Fair prioritization of reading list processing

Library Workflows

Automate Workflows

Highlights:

- Change completed citations' status upon metadata change (H1 2021) 
- New configuration for automatically changing citation status to Complete for articles with an unlimited number of licenses (H1 2022)
- Enable Process and Enrich Citations to run as a scheduled job (H2 2022)
- Recalculate the status of a completed reading list when a citation status reverts to not-complete (H1 2021) 

Impact:

Decreasing library workload

Library Workflows

Operations on Multiple Items (Bulk Operations)

Highlights:

- Keep investing in bulk operations, adding options such as:
 - 'Place Request' in bulk from the Citations screen (H1 2022)
 - Set list owner on multiple lists, using the list bulk update job (H2 2021) 

Impact:

Efficiently managing reading lists and citations

Library Workflows

Search and Navigation

Highlights:

- Search for a citation within a list (H1 2022)
- Add the ability to search by list ID to the list search in Alma (H1 2022)
- Easy navigation - open a citation in Alma from Leganto (H1 2022)
- Open Leganto from Alma main page (H1 2022)

Impact:

Quick navigation

Library Workflows

Collection Management

Highlights:

- Adding physical book loan statistics to the course reserves subject area for keeping track of loan statistics per course (H1 2021)

Impact:

Using course usage information when managing collections

Library Workflows

Technology Upgrades

Web Application Framework Upgrade (H1 2021 - H1 2022)

- Leganto is using Angular as its web application framework. Angular is an open-source framework, led by Google.
- This year we will be moving from the Angular 1 framework to Angular 10.
- This change is recommended by Google and will give Leganto more UI capabilities.

Connecting Leganto to the Learning Management System through LTI 1.3 (H2 2021)

- LTI 1.3 is a new method for connecting an external tool to the Learning Management System.
- Leganto will offer new functionality based on the capabilities of LTI 1.3, such as updating grades in the Learning Management System from Leganto.

Thank you!

Dolav Ben Artzi
