Main Features

NERS: Indication for Courses that Deliberately Have No Reading List

January 2023 Leganto

NERS Enhancement (ID #7744)

Your institution likely has a number of courses that will never require a reading list. You can now add a **No list expected** indication to a course to indicate to library staff that the course deliberately does not include a reading list. Marking courses that will not have reading lists can help you when communicating with instructors, and when reporting on the percentage of courses the library supports through reading lists.

Note

Reading lists can still be added to courses with the **No list expected** checkbox checked. Additionally, existing lists are not removed when the **No list expected** checkbox is checked.

No list expected checkbox

In the Courses table (**Fulfillment > Course Reserves > Courses**), the **No list expected** column indicates which courses have the **No list expected** checkbox checked.

Note

The **No list expected** column is hidden by default. To show the **No list expected** column, select the column from the Manage column display

GuideMe Add Course											
Code	Section	Name	Academic Department	Processing Department	Instructor	Status	Start Date	End Date	Term	Visibility	No list expected
1 HUS101	-	Health & Human Services		Art and Architecture	Instructor, Gil	Inactive	05/24/...	05/13/...	Autumn	Unarchi...	
2 BTR202	-	Butterflies Intro		Art and Architecture	Instructor, Min	Inactive	05/24/...	05/24/...	-	Unarchi...	
3 83608	-	History of Time		Main Library	-	Active	11/14/...	11/14/...	-	Unarchi...	
4 555	-	Art History	History	History	Multiple	Active	02/09/...	03/12/...	-	Unarchi...	☒
5 444	-	Sociology	Social Sciences	Main Library	Multiple	Active	02/09/...	03/09/...	-	Unarchi...	

No list expected column

If the librarian selects the **Leganto create list - reminder email** action for a course that has the **No list expected** checkbox checked, the librarian can still send the reminder email, but an alert appears indicating that **This course is marked as 'No list expected'**.

Leganto create list - reminder email

Note: This course is marked as 'No list expected'

The due date in the letter will be

'No list expected' alert

When duplicating a course that has the **No list expected** checkbox checked, the **No list expected** checkbox is checked on the duplicated course.

When rolling over a course that has the **No list expected** checkbox checked, the **No list expected** checkbox is checked on the rolled over course.

The **Course Bulk Update** job (**Admin > Manage Jobs and Sets > Run a Job**) now includes the condition **Excluded courses marked as 'No list expected'** when the **Leganto create list - reminder email** checkbox is checked. This enables you to not send the Leganto create list reminder email to instructors whose courses intentionally do not include reading lists when the **Course Bulk Update** job runs.

Exclude courses marked as 'No list expected' when sending bulk reminders

Note

The **No list expected** indication will be added to Analytics in the February release.

For more information, see [Working with Courses](#).

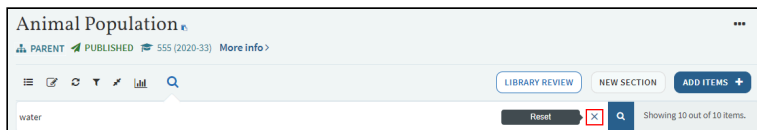

Additional Enhancements

- January 2023 Leganto

Idea Exchange

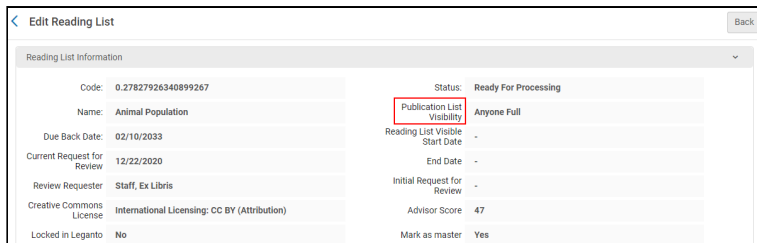

Previously, when selecting the **Reset X** after searching for items within a list, the search term cleared, but the results remained. Now when selecting the **Reset X** after searching for items within a list, the search term clears and the results are reset.

Reset search

- January 2023 Leganto

To describe the attribute more accurately and match the analytics term, the **Publication Status** attribute was changed to **Publication List Visibility**.

Publication List Visibility label

- January 2023 Leganto SF: 06528866

When exporting a file to RIS, the Y1 field now only includes the YYYY digits so that when the RIS is imported, the publication year populates as expected.

Resolved Issues

- January 2023 Leganto SF: 06530718

Previously, there was no option to translate the CiteIt! **Grab here to drag this window** text. You can now add a translation for **citeit.greb.here** ([Configuration > Leganto > General > Labels](#)).

- January 2023 Leganto SF: 06539784

The list status label **citation.status.BeingProcessed** was missing from the Labels Code Table ([Configuration > Leganto > General > Labels](#)). This was fixed.

- January 2023 Leganto SF: 06535670

Instructor-Library tags did not appear on new citations until refreshing the page. This was fixed.

- **January 2023 Leganto SF: 06535083**
In some cases, permalinks from rolled over courses did not open the correct links when the course was published. This was fixed.
- **January 2023 Leganto SF: 06530290**
In some cases, citations with **Type** Journal could not be saved. This was fixed.
- **January 2023 Leganto SF: 06518583**
Citations with many tags did not include a scrollbar. This was fixed.
- **January 2023 Leganto SF: 06544357**
When using Quick Cite for citations using the Harvard CSL style, the references listed the second author as an editor. This was fixed.
- **January 2023 Leganto SF: 06499977 06561578**
In some cases, completed citations appeared in the **Ready for Processing** task list. This was fixed.
- **January 2023 Leganto SF: 06483272**
In Canvas, in some cases, PDFs were partially cut off by the right side panel. This was fixed.
- **January 2023 Leganto SF: 06503914**
In some cases, when running the **Course Bulk Update Job** to remove a list association, some courses that should have still been associated with the reading list were missing. This was fixed.
- **January 2023 Leganto SF: 06482028**
Deduped primo records when turned into a Leganto citation did not always display the **E** holding even though the **primo_availability_for_citations_added_from_primo** parameter was configured. This was fixed.
- **January 2023 Leganto SF: 06465690 06287393**
Previously, the Leganto UI language did not update until the page was refreshed. This was fixed.
- **January 2023 Leganto SF: 05329002**
CDI records for videos that use direct links included the citation metadata but not the link to the video. This was fixed.
- **January 2023 Leganto SF: 05318981**
Previously, the citation **Status** was changed from **Complete** to **Being prepared** when a list was duplicated. This was fixed.
