ExLibris SFX

Release Notes

20172400

Table of Contents

Highlights

21 targets added
New User Interface for the Journal AZ List
Sidebar improvement
Change SFXAdmin login page
Updated support software

Targets to be removed in the next (the 20172500) revision:
WILEY_ONLINE_LIBRARY_OPEN_ACCESS_2014 – requested by the vendor, collections are not annual.
Content can be found in WILEY_ONLINE_LIBRARY_OPEN_ACCESS

WILEY_ONLINE_LIBRARY_OPEN_ACCESS_2015 – requested by the vendor, collections are not annual.
Content can be found in WILEY_ONLINE_LIBRARY_OPEN_ACCESS

WILEY_ONLINE_LIBRARY_OPEN_ACCESS_2016 – requested by the vendor, collections are not annual.
Content can be found in WILEY_ONLINE_LIBRARY_OPEN_ACCESS

WILEY_ONLINE_LIBRARY_OPEN_ACCESS_FREE_2013 – requested by the vendor, collections are not annual.
Content can be found in WILEY_ONLINE_LIBRARY_OPEN_ACCESS and WILEY_ONLINE_LIBRARY_FREE_CONTENT

WILEY_ONLINE_LIBRARY_FREE_2014 – requested by the vendor, collections are not annual.
Content can be found in WILEY_ONLINE_LIBRARY_FREE_CONTENT

WILEY_ONLINE_LIBRARY_FREE_2015 – requested by the vendor, collections are not annual.
Content can be found in WILEY_ONLINE_LIBRARY_FREE_CONTENT

WILEY_ONLINE_LIBRARY_FREE_2016 – requested by the vendor, collections are not annual.
Content can be found in WILEY_ONLINE_LIBRARY_FREE_CONTENT

Applying the Revision
The following packages are released:
sfx-kbsw-update-20172400.run
sfx-kbdb-update-20172400.run
sfx-sw-update-4.10.0.run
sfx-extra-update-4.10.0.run

For directions on applying the revision, refer to the **SFX KB Update** section of the *SFX General User's Guide.*

Highlights (June Software Release)

New User Interface for the Journal A-Z List
This release introduces a new journal search and A-Z list user interface, accessible with its own URL and configurable via the SFX Admin Center. Go to the "Journal Search and A-Z List" section on the SFX Admin Center homepage for details. All configuration options are documented in the *SFX General User's Guide*.
In addition, a new KnowledgeCenter article provides information on how to localize the new interface:
https://knowledge.exlibrisgroup.com/SFX/Knowledge_Articles/Configuring_Journal_Search
A new interface for the CitationLinker and the ebook search is planned to become available in the September and December releases respectively.

Sidebar Improvement
The behaviour of the sidebar was improved to deal with situations where SFX is running with HTTPS, but the target provider platform is only accessible with HTTP.
In such scenarios, SFX will now open a new browser tab with the provider page content.

New SFXAdmin Login Page
A section was added to the SFXAdmin login page to:
- list the highlights for each quarterly software release
- display a section where other interesting news can be added
Additionally, information was added to indicate which release version the SFX installation is on.

Updated Support Software
Openssl was updated to version openssl-1.0.2k.
Jquery was updated from 1.11.3 to 2.2.4.

Changed KB Software

Type of Change	Component	Description	Solution	File List
Correction	TargetParser	Add atitle exception to PubMed::central	The PubMed::central target parser was updated to improve article level linking.	lib/Parsers/TargetParser/PubMed/central.pm
Correction	Configuration File	Add DOI prefixes to doi_allowed config	The DOI allowed configuration file was updated to support additional prefixes.	config/doi_allowed_prefixes_for_linking.config_
Correction	TargetParser	Add exception to NATURE::NATURE	The NATURE::NATURE target parser was updated to improve article level linking.	lib/Parsers/TargetParser/NATURE/NATURE.pm
Correction	TargetParser	Convert roman numeral volumes in JSTOR::JSTOR	The JSTOR::JSTOR target parser was updated to convert roman numerals to numerical digits, and an exception was added.	lib/Parsers/TargetParser/JSTOR/JSTOR.pm
Correction	TargetParser	Add roman numeral converter functionality to TargetParser.pm	Roman numeral converter functionality was added to the main target parser file.	lib/Parsers/TargetParser.pm

Issue Type	Component/s	Summary	Documentation Required	Changed Files	Key	SF Case
Enhancement	Back Office - Statistics, Back Office - Task Manager, General - KBManager	Jquery was updated from 1.11.3 to 2.2.4. The SFX programs affected by this update: * Task Manager * Feedback target template * Proxy configuration - add & edit page * KBManager - Institutes * Statistics results page		templates/sfxctrl/custom/proxy_add_edit.tmpl templates/sfxctrl/institute_setup/list_head.tmpl templates/sfxctrl/stats/result_head.tmpl templates/targets/feedback/feedback.tmpl templates/sfxctrl/task_manager/add.tmpl templates/sfxctrl/task_manager/calendar.tmpl templates/sfxctrl/task_manager/head.tmpl templates/sfxctrl/task_manager/view_and_edit.tmpl templates/sfxctrl/task_manager/view_recommended.tmpl templates/sfxctrl/task_manager/view_unsupported.tmpl	SFX-6735	
Enhancement	Utilities - Revision Update	Updated the openssl version to openssl-1.0.2k.		revision_maker/applyextra/extra.conf	SFX-6808	
Defect	APIs - RSI	Fixed the problem in SFX APIs caused by expanding limitation of svc.fulltext to include getMessageNoFullTxt. This expansion was changed to be used only for the HTML menu and not API responses. (controlled by sfx.response_type parameter).		lib/ContextObject/Engine/OpenURL.pm	SFX-6781	402079
Defect	Back Office - General (SFX)	Fix the problem with incorrect display of some parsedDate thresholds in the SFX Admin Center interface.		templates/sfxctrl/target/list.htm templates/sfxctrl/target_service/list.htm	SFX-6678	

Issue Type	Component/s	Summary	Documentation Required	Changed Files	Key	SF Case
Defect	Back Office - General (SFX)	Update DOI links to use HTTPs		lib/MetaData/FetchDOI.pm lib/NetWrap/HTTP.pm config/crossref.config revision_maker/applysw/foreachinstance.pl revision_maker/applysw/update_crossref_config_https.pl	SFX-6685	393948
Defect	Back Office - General (SFX)	URL for fetching DOI updated from: http://dx.doi.org to: https://doi.org in config/crossref.config		config/crossref.config <extra> revision_maker/applysw/foreachinstance.pl revision_maker/applysw/update_crossref_config_https.pl </extra>	SFX-6918	
Defect	Back Office - SFXAdmin - General	Added the following security attributes to SFX Admin session cookies: sfx_session_id, SFXAdmin. Ensure that the httponly attribute is always added to make cookie inaccessible by JavaScript. When accessing SFX Admin by HTTPS, the secure attribute was added so as not to keep this cookie for non-HTTPS connections.		lib/Manager/Session.pm lib/SFX/Util.pm sfxadmin/sfxctrl.cgi	SFX-6832	00398887, 00399290
Defect	BO KB Tools - Data Loader	Fixed the issue with translating ELECTRONIC to PRINT ISSNs in dataloader which eliminated the warning in the dataloader error log.		lib/Admin/Tool.pm	SFX-6602	380938

Issue Type	Component/s	Summary	Documentation Required	Changed Files	Key	SF Case
Defect	BO KB Tools - Export Tool	Fixed the problem with PARSE_PARAM and IS_FREE columns not being included in the Advanced Export TXT format.		lib/Admin/Tool.pm	SFX-6384	
Defect	Core - SFX Menu	Fixed problem with SFX Aleph PlugIn causing the Aleph X-server to not respond properly. The maximum number of ISBN identifiers sent to Aleph in a single request was set to 15. In some edge cases this restriction was not applied, causing errors to be returned by the catalog.		lib/Parsers/PlugIn/ALEPH.pm	SFX-6677	390353
Defect	Front End - SFX Menu	Fixed the problem with XSS violations errors appearing after SP SP 4.9.3. Due to false-positive XSS detection in some cases, we removed the following two patterns from XSSlist.config: [\"\'].*?\>.*?\<.*?\w[\w\d]*?\s*\(.*?[\"\'] \<.+?\>.+?\<\/.+?\> These patterns will no longer be tested in SFX Front Ends. In Back Office, we sanitized the input parameters instead.		config/XSSlist.config lib/MetaData/Validator.pm sfxadmin/sfxctrl.cgi revision_maker/applysw/foreachinstance.pl revision_maker/applysw/remove_redundant_xss_patterns.pl	SFX-6898	

Issue Type	Component/s	Summary	Documentation Required	Changed Files	Key	SF Case
Defect	Front End - SFX Menu - DirectLink	Fixed the issue when accessing the sidebar with HTTPS and target information provider content in HTTP resulting in white/empty screen instead of provider content. Now in this case, instead of provider content we display a link to open provider content in new browser tab.		lib/SFXMenu/Engine.pm lib/SFXResolver/Engine.pm lib/SFXMenu/Output/DirectLinkWithSidebar.pm templates/direct_link/sidebar.tmpl templates/js/direct_link/sidebar.js	SFX-6739	00394222, 00396992, 00397789, 00399376
Defect	General - Other	XSS vulnerability improvements. New regular expression were added to the existing list, in order to validate <...> ... </...> patterns in incoming URL parameters. This new pattern will be validated for SFX Admin URLs only.		config/XSSlist.config lib/MetaData/Validator.pm revision_maker/applysw/add_xss_tags_sfxadmin_section.pl	SFX-6719	
Defect	General - Other	Fixed the problem with script retrieving meta data about holdings files (get_file_metadata.cgi). In some cases, the script was failing with the error: `Access Denied Error.`		cgi/public/get_file_metadata.cgi	SFX-6804	

Issue Type	Component/s	Summary	Documentation Required	Changed Files	Key	SF Case
Defect	General - Other	Enhanced regular expression for detecting XSS attack with use of different events: onclick|oncontextmenu|ondblclick|onmousedown|onmouseenter|onmouseleave|onmousemove|onmouseover|onmouseout|onmouseup|onload|onpageshow|onpagehide|onresize|onscroll|onunload		config/XSSlist.config lib/MetaData/Validator.pm sfxadmin/print_header.cgi sfxadmin/print_refresh_frame.cgi revision_maker/applysw/change_xss_regex.pl	SFX-6701	00398887, 00399290
Enhancement	JournalSearch - BO	Included Journal Search and Translations & Display configuration sections in the SFX Admin Center for AdministratorLight BO user role.		config/user_permissions.config lib/Admin/KBManager/Output/header.pm templates/sfxctrl/admincenter_light.html revision_maker/applysw/foreachinstance.pl revision_maker/applysw/add_permissions_to_admin_light.pl	SFX-6909	
Defect	SFX Menu - SFX Menu	Fixed the problem with the Import Target Precedence wizard redirecting to the Login page in some cases.		sfxadmin/precImportWiz.cgi	SFX-6789	395507
Defect	SFX Menu - SFX Menu	Fixed the problem with access to PUBMED for environments getting internet access via proxy only and having problems with HTTPs.		lib/NetWrap/HTTP.pm	SFX-6584	359733
Defect	SFX Menu - Source Parsers	Added support for retrieving the DOI value from DOI URL sent to SFX in form: https://dx.doi.org/<DOI>. Previously, only links starting with http:// were supported.		lib/ContextObject/Engine/OpenURL.pm	SFX-6905	

Issue Type	Component/s	Summary	Documentation Required	Changed Files	Key	SF Case
Defect	Utilities - Revision Update	Fixed the problem with installing SFX extra updates on some versions of RH7.		revision_maker/applyextra/extra.conf	SFX-6603

Implementation Instructions

Implementation Instructions for the SFX June 2017 ServicePack

Going Live with the New A-Z User Interface

The new A-Z user interface version has its own URL.

- `<SERVER>/<INSTANCE>/journalsearch` is the URL for the new UI.

- `<SERVER>/<INSTANCE>/az` is the URL for the old UI.

If you only link to your Journal Search page from your library homepage, it is easiest to just change that link to the new URL. However, if you have inserted the link in many different places, or you do not know where else it might be used (users may have bookmarked the link), you can also change the Apache configuration to redirect the old links to the new pages.

To do this, make the changes below to the following file: `config/local_httpd.config`:

1. **Add the yellow/red rule below the existing rule:**

   ```
   RewriteRule      ^/<INSTANCE_NAME>(-[^/]+)?/journalsearch(.*)
   /<INSTANCE_NAME>/az$2?param_perform_value=journalsearch
   [QSA,PT,E=__INST_URL_PART:$1]
   RewriteRule      ^/<INSTANCE_NAME>(-[^/]+)?/az(.*)
   /<INSTANCE_NAME>/az$2?param_perform_value=journalsearch
   [QSA,PT,E=__INST_URL_PART:$1]
   ```

2. **Replace <INSTANCE_NAME> with the requested instance name**

   Note:

   > You must restart Apache in the local instance where the change was made. Information about restarting Apache can be found in the *SFX System Administrator's Guide*.

For customers with local installations only (does not apply to Ex Libris cloud customers):

If you use an alias in your apache configuration to point from the instance name to an external name, (for example the instance name is sfxlcl4, and you configured the external URL to redirect from sfx_local to sfxlcl4), you need to amend the rewrite rules that were added to your apache configuration for the journal search user interface.

Note: This applies only to customers with local installations.

1. **Login to the SFX server as the local instance and open the following file for editing:**

   `/exlibris/sfx_ver/sfx4_1/<local instance>/config/local_httpd.config`

2. **Manually change the instance name in the five new RewriteRule directives listed below in the beginning of the file or run the following commands if you use the 'vi' editor (notice the spaces in the second command):**

   `:%s/\^\/old_name/new_name/`

   `:%s/ \/old_name/ \/new_name/`

3. **Restart local Apache**

The following rewrite rules were added to the `local_httpd.config` configuration file for the journal search user interface:

```
RewriteRule ^/sfxlcl41(-([^/]+))?/api/sfxmenu/openurl/(.+)
/sfxlcl41/cgi/core/api.cgi?restidentifier=sfxmenu&sfx.institute=$2&$3
```

```
[QSA,PT,E=__INST_URL_PART:$1]

RewriteRule ^/sfxlcl41(-[^/]+)?/api/configuration/([^/]+)(/([^/]+))?
/sfxlcl41/cgi/core/api.cgi?restidentifier=configuration&control_group=$2&control
_section=$4 [QSA,PT,E=__INST_URL_PART:$1]

RewriteRule ^/sfxlcl41(-[^/]+)?/api/journalsearch/([^/]+)/([^/]+)/(.+)
/sfxlcl41/cgi/core/api.cgi?restidentifier=journalsearch&profile=$2&searchtype=$3
&searchterm=$4 [QSA,PT,E=__INST_URL_PART:$1]

RewriteRule ^/sfxlcl41(-[^/]+)?/api/multilanguage/([^/]+)/([^/]+)
/sfxlcl41/cgi/core/api.cgi?restidentifier=multilanguage&language=$2&group=$3
[QSA,PT,E=__INST_URL_PART:$1]

RewriteRule ^/sfxlcl41(-[^/]+)?/journalsearch(.*)
/sfxlcl41/az$2?param_perform_value=journalsearch [QSA,PT,E=__INST_URL_PART:$1]
```
